

BARAKA – Lightpaper

A Transparent, Blockchain-Based Zakat Ecosystem

Token Symbol: BRK | Network: Ethereum

Version: July 2025

◆ What Is BARAKA?

BARAKA is a decentralized platform built to transform how Muslims fulfill their Zakat duties. Using the power of blockchain and cryptocurrency, BARAKA enables fast, transparent, and trustworthy donations to verified Islamic charities — from anywhere in the world. The BRK token lies at the core of the platform, enabling donations, creating incentives, and unlocking financial tools for the Islamic philanthropic economy.

◆ The Problem

Zakat, a central pillar of Islam, requires Muslims to donate 2.5% of their wealth each year. Yet, the global Zakat ecosystem suffers from:

- Lack of transparency
- No centralized verification system for charities
- Barriers to cross-border giving
- Skepticism around fraud, misuse, and inefficiency

Muslims in the diaspora often feel disconnected from the giving process, unsure if their donations are reaching legitimate causes — or even fulfilling their religious obligation.

◆ Our Vision

◆ The Solution

BARAKA provides a seamless Web3 donation experience:

- Connect a crypto wallet (e.g., MetaMask)
 - Swap or purchase BRK tokens
 - Browse verified charities (Arabic + English)
 - Donate (anonymously or not), one-time or recurring
 - Receive blockchain-based certificates
 - Track all donations on-chain via a personal dashboard
-

◆ Tokenomics

Token Symbol: BRK

Total Supply: 1,000,000,000 (Fixed — no future minting)

Initial Allocation:

- 10% — Baraka Foundation (operations & growth)
- 5% — Founders & Team (locked with manual vesting)
- 2.5% — Distributed equally to all verified charities approved before launch

- 82.5% — Released only via donation-based emissions
-

◆ Zakat-Based Emission Model

BRK introduces a real-world anchored emission mechanism:

- BRK is only unlocked when real Zakat donations are made
 - A smart contract governs token flow and burn logic
 - Donating = releasing BRK + triggering a partial burn
 - Ensures value = impact, discouraging speculation
-

◆ Launch Timeline

Token Launch – August 8, 2025

- Public listing on Uniswap (ETH pair)
- 8 ETH provided as liquidity
- 200M BRK permanently locked for LP
- 2.5% supply airdropped to verified charities

Platform Launch (MVP) – September 9, 2025

- Web + Mobile platform
 - Wallet connection
 - BRK purchase + donation flow
 - Charity search + profiles
 - Transparent donation dashboard
 - Arabic & English interfaces
-

◆ **Verified Charity Participation**

BARAKA works only with screened, verified nonprofits.

All organizations approved before August 8, 2025 will receive an equal share of the 2.5% BRK charity airdrop — whether there are 20 or 200 participants.

◆ **Community & Growth**

- No public token sale — private investors only
 - Organic growth through content, PR, and influencers
 - Focus on long-term value, trust, and Islamic alignment
 - No airdrops or speculative giveaways
 - DAO and staking planned post-launch
-

◆ **Why BARAKA Matters**

In a world of broken donation pipelines and opaque systems, BARAKA:

- ✓ Ensures trust
- ✓ Verifies every cause
- ✓ Tracks every donation
- ✓ Aligns faith with finance

It's not just crypto — it's transparent, ethical giving for the Muslim world.
